

- **Infocom World Conference & Exhibition 2022**
- **(November 29, 2022)**

**“Horizon projects for
Citizens Wellbeing using
EO, IoT and
Telecommunication Assets:
The Examples of D2EPC,
euPOLIS, HEART and
HARMONIA”**

Betty Charalampopoulou
Geosystems Hellas S.A.

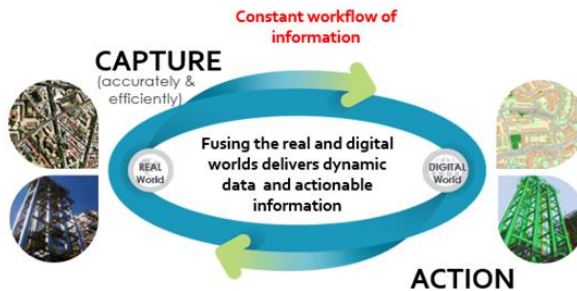

- **Session 9: Facing Market Needs and Applications for Enhancing Wellbeing of Citizens**
- **Time-Slot: 18h30' – 19h15'**

Geosystems Hellas

- Established in Athens in 2009 as the newest member of GEOSYSTEMS EU GROUP, with shareholder minority on GS GmbH and the rest.
- Nowadays, [GSH] is a Greek SME with a German minority shareholder who was fully acquired from OHB SE on February 2022, so [GSH] is a “sister company” to OHB SE.
- [GSH] has a Dynamic participation to the downstream space sector.
- [GSH] is a funded member of the si-cluster since 2014 (the Unique Hellenic Space Cluster) the Hellenic Association of Space Industry (HASI) and the European Association of Remote Sensing Companies (EARSC) actively participating in the board as the GSH CEO is an elected representative.
- GSH CEO is an EARSC Director and appointed to GEO as the EARSC representative for the Post-2025 Working Group (preparing the Ministerial 2023 and 2015).
- [GSH] participates in ESA and GEO working groups.

- Serves and consult on services and products to public and private through various industrial projects on
 - ❖ Photogrammetry,
 - ❖ Remote Sensing,
 - ❖ Space & Earth Observation,
 - ❖ GIS,
 - ❖ Imagery intelligence (IMINT)
 - ❖ Geospatial intelligence (GEOINT)
 - ❖ and Smart Cities
- GSH is The Hexagon Geospatial sole reseller and Hexagon Airborne Solutions authorized reseller in Greece and Cyprus.
- GSH participates in National and European R&D projects and opportunities on the fields of Environment & Climate Change Adaptation, Urban Resilience & Well-being, Culture Heritage Preservation, Forestry & Agriculture, ICT, and Digital Twin Model.

The implementation of the “New space economy”

▪Resilience

- ✓Near real time monitoring by Earth Observation technologies
- ✓Definition of risks (risks & hazards)
- ✓Earth observation and Decision Systems
- ✓Smart cities & security / Emerging Technologies and Blockchain
- ✓Borders monitoring and EO contribution to DSS

▪Adaptation

- ✓Proposals and design
- ✓Utilities
- ✓Culture Heritage
- ✓Biodiversity

▪Sustainable development

- ✓Change of urban zone
- ✓Design of green structures in the city
- ✓NBS & blue and green growth
- ✓Citizen health and quality of life
- ✓GIS / WebGIS

- ❖ High-level applications of remote sensing and photogrammetry, in the space sector
- ❖ Software solutions for on-board and on-site atmospheric correction, cloud cover control and generation of high precision cloud mask
- ❖ Management techniques for big data analysis, machine learning techniques (Big Data Analysis, Data Fusion, ML/DL), - System & Software design and development
- ❖ Airborne Lidar 3D monitoring techniques – development of detectable traces methodology
- ❖ Spatial analysis and GIS / WebGIS applications
- ❖ Geospatial intelligence (GEOINT) and data analytics
- ❖ Smart cities and Security – Earth Observation and Blockchain solutions

Recent & Current collaborations on:

- Earth Observation (EO)
- NBS & Blue/Green growth
- Lidar point cloud processing
- Monitoring Cultural Heritage
- Monitoring hazards & Decision Support Systems & Early Warning Systems
- EO application for security

HORIZON 2020/EUROPE
National R&D projects
National Projects Service Delivery

Ongoing R&D projects under the H2020 framework

Integrated NBS-based Urban Planning Methodology for Enhancing the Health and Well-being of Citizens

Ongoing R&D project
<https://eupolis-project.eu/>

Development of a Support System for Improved Resilience and Sustainable Urban areas to cope with Climate Change and Extreme Events based on GEOSS and Advanced Modelling Tools

Ongoing R&D project

DYNAMIC DIGITAL ENERGY PERFORMANCE CERTIFICATES

Ongoing R&D project
<https://www.d2epc.eu/en>

Planning And Engagement Arenas For Renewable Energy Landscapes

Ongoing R&D project
<https://pearlsproject.org/>

REmote SEnsing techniques for ARCHaeology

Ongoing R&D project
<https://www.re-se-arch.eu>

STructural stAbility risk assEssment

Ongoing R&D project
<http://www.stable-project.eu/>

HEALTHIER CITIES through Blue-Green Regenerative Technologies

Ongoing R&D project

Development of Utilities Management Platform for the case of Quarantine and Lockdown

Ongoing R&D project

Ongoing National R&D projects

Ανάπτυξη πΡακτικών και δημιουργία Τυποποιημένης υπηρεσίας παρακολούθησης των οικονομικών δατών

Ongoing R&D project
<https://artemis2018.eu/>

Information System For Multi-Level Documentation Of Religious Sites And Historic Complexes

Ongoing R&D project
<https://www.meteora.net.gr/>

ExPERT Integrated suPport systEm for coastal mixed urbAn – industrial – critical infrastructure monitoring using Combined technologies

Ongoing R&D project
<http://epipelagicproject.com/>

Πλασφόρια πολυΡαμεικής παραΚούλησης με μικροΑισθητήρες του eNcleiadus hellenic supersite

Ongoing R&D project

CompOlive Project

Ongoing R&D project
<http://compolive.eu/en/main>

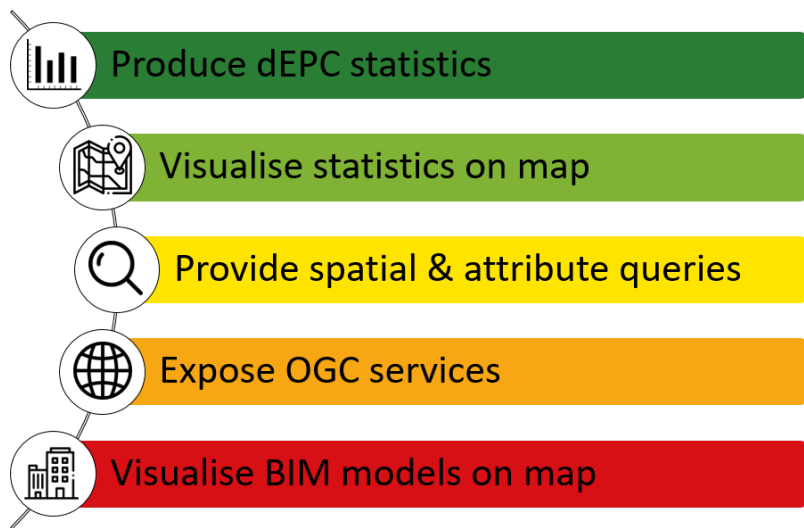

Sustainable Development of Less Developed Regions and Isolated Areas by Creating New Touristic Resources and Products through Analysis, Documentation and Modelling of Cultural Asset

Ongoing R&D project

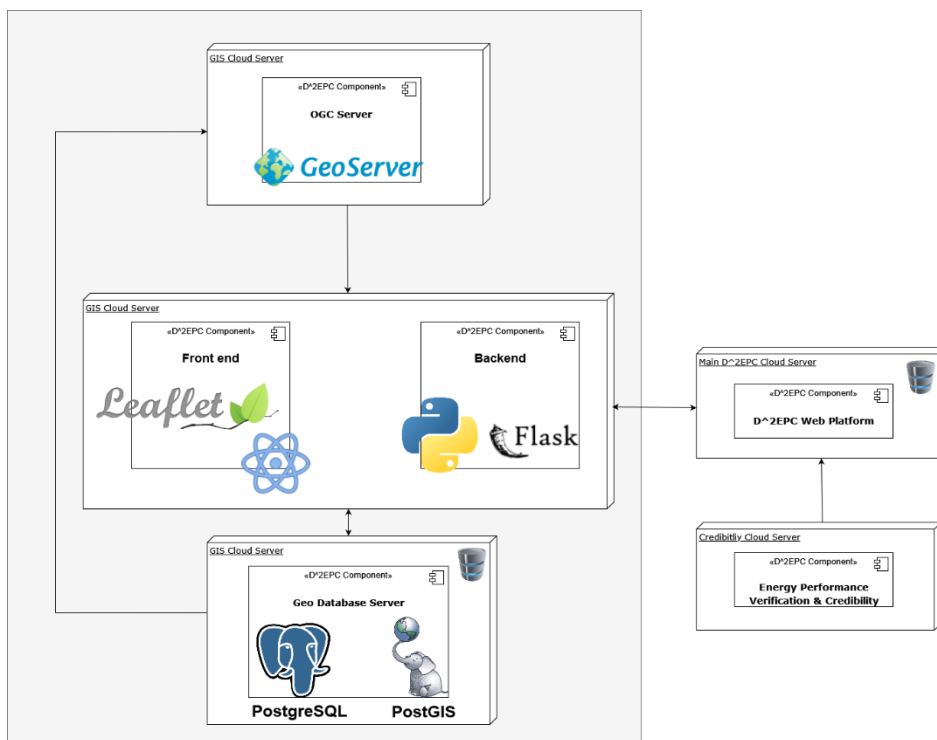

D^2EPC - Dynamic Digital Energy Performance Certificate

The project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No.892984

WebGIS tool functionalities:

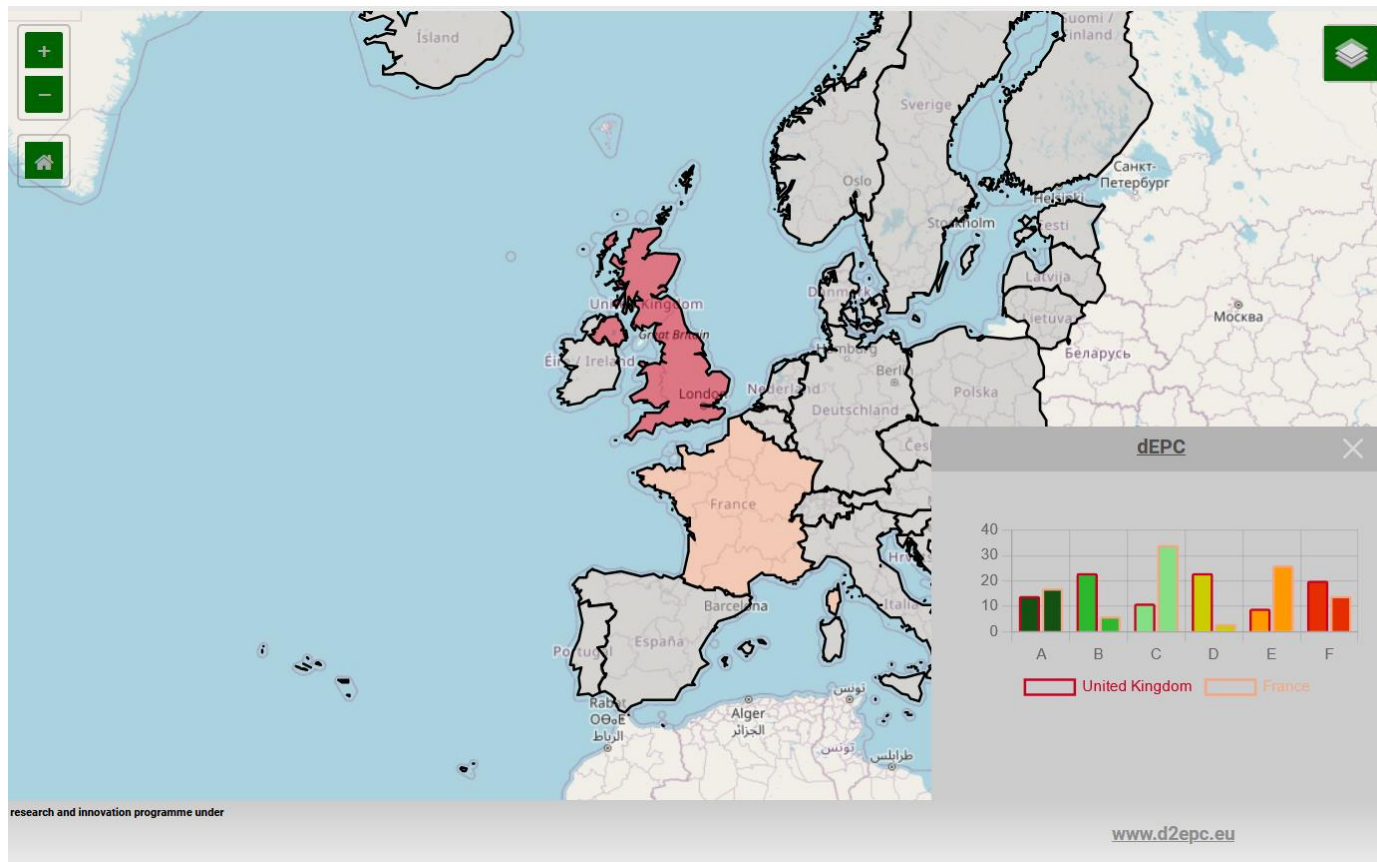

WebGIS tool's technology stack:

D^2EPC - Dynamic Digital Energy Performance Certificate

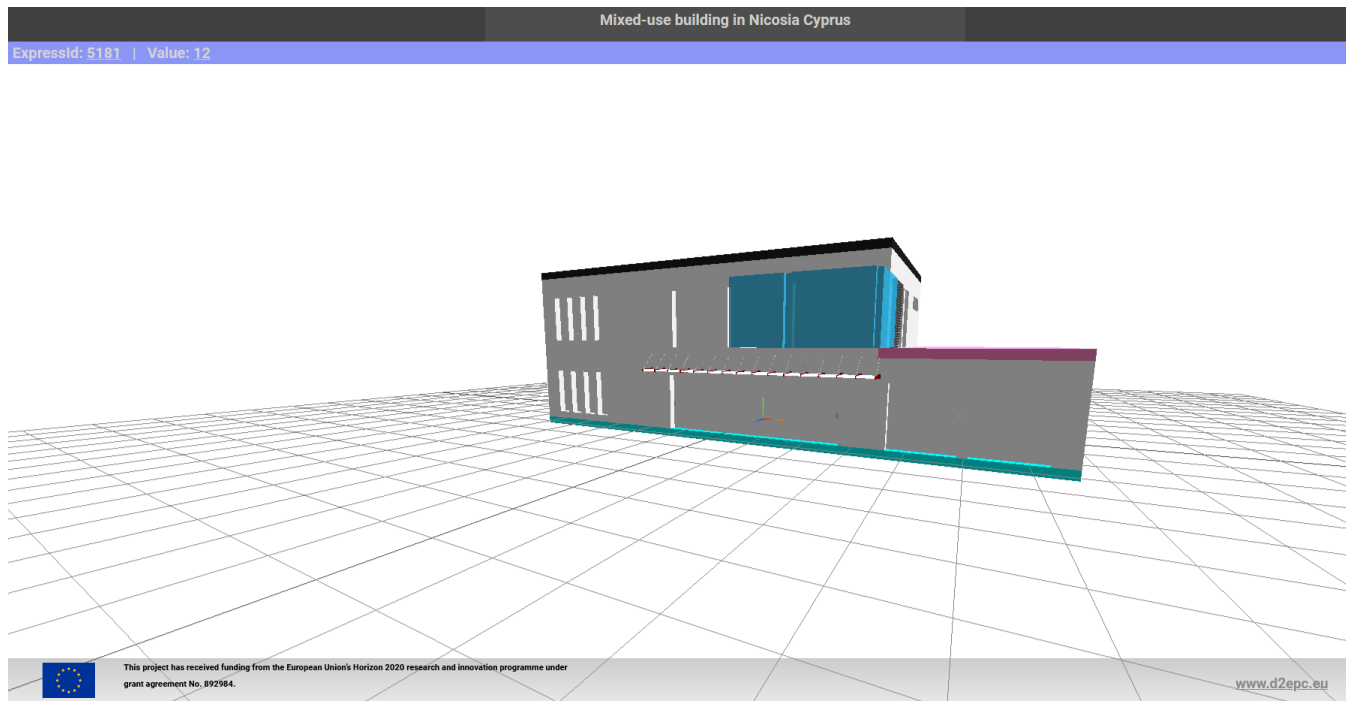

Produce dEPC statistics

D^2EPC - Dynamic Digital Energy Performance Certificate

Visualise BIM models on map

euPOLIS - Integrated NBS-based Urban Planning Methodology for Enhancing the Health and Well-being of Citizens: the euPOLIS Approach

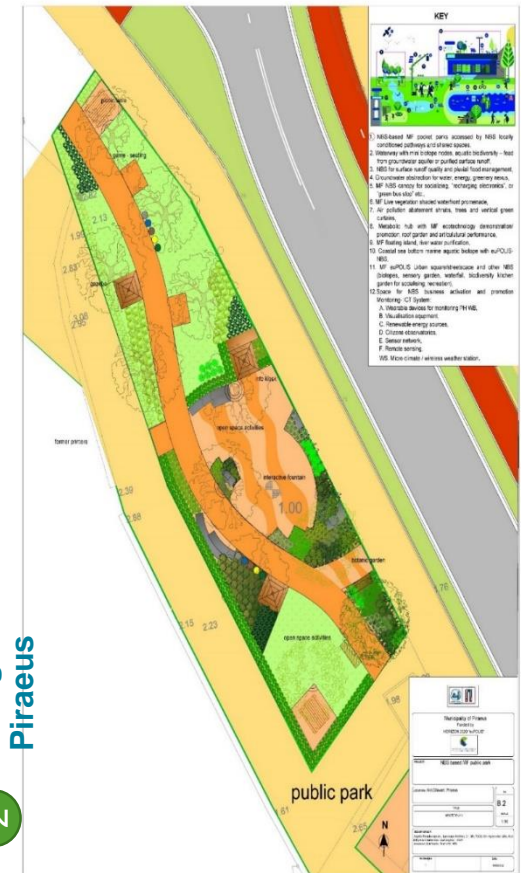

The euPOLIS project has received funding from the European Union's Horizon 2020 Research & Innovation programme H2020-EU.3.5.2., under grant agreement No.869448.

Sample of the elected interventions in the Demo Sites of Piraeus:

1 Designed Intervention – Canal pilot cleaning in Piraeus

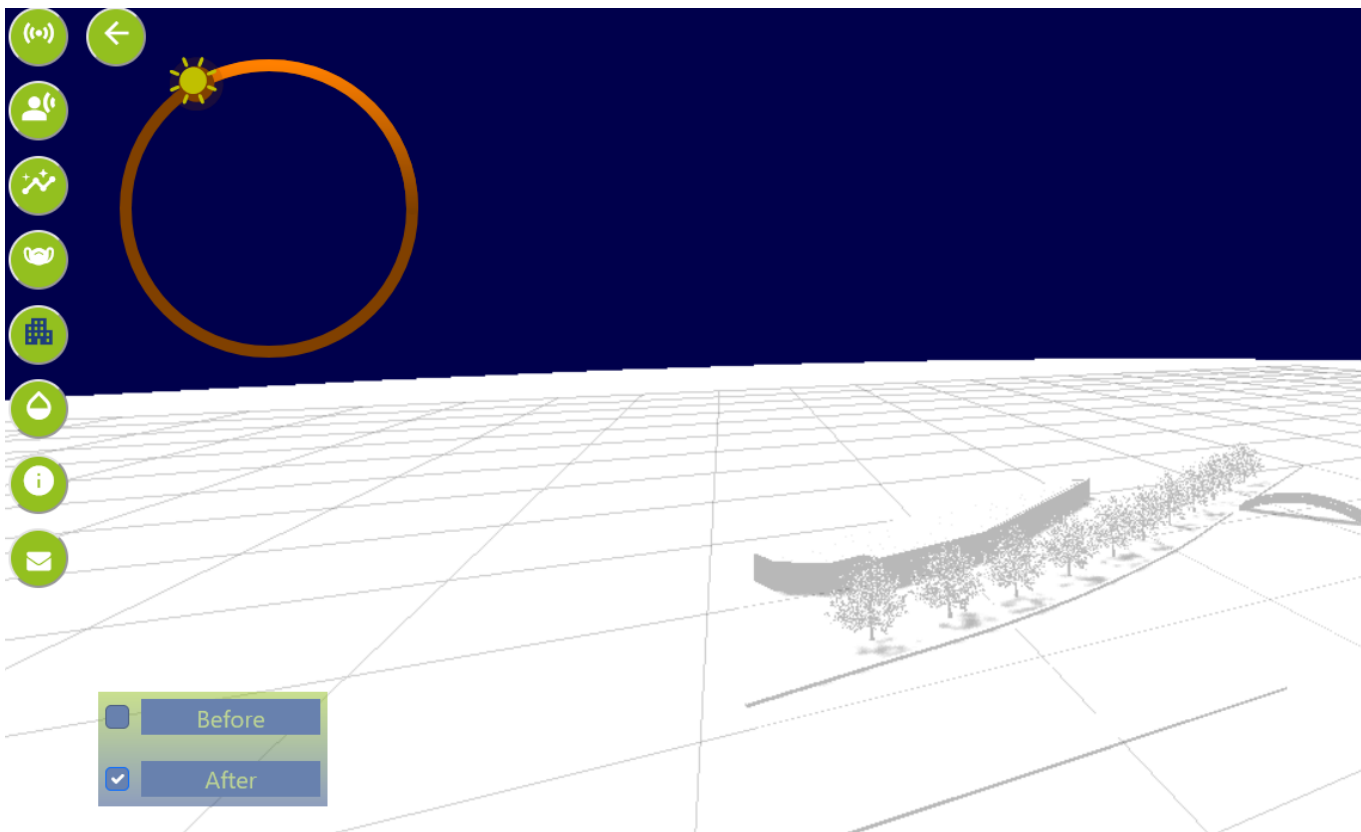

2 Designed Intervention - Pocket Park in Piraeus

euPOLIS - Integrated NBS-based Urban Planning Methodology for Enhancing the Health and Well-being of Citizens: the euPOLIS Approach

Visualize the designed interventions per Demo Site

euPOLIS - Integrated NBS-based Urban Planning Methodology for Enhancing the Health and Well-being of Citizens: the euPOLIS Approach

Visualize plots regarding Weather & Air Pollution parameters for specific areas of interest

HEART - HEAlthier Cities through Blue-Green Regenerative Technologies: the HEART Approach

This project has received funding from the European Union's Horizon 2020 Research and Innovation Program under grant agreement No.945105.

Remote Sensing toolkit using Machine Learning algorithms to extract urban environmental indicators from VHR satellite images in order to be further correlated with health data and assess the impact of BGS to Public Health and Well Being.

AI Based Raster Classification:

6 classes

Water

Vegetation

Streets

Red Roofs

Mixed urban

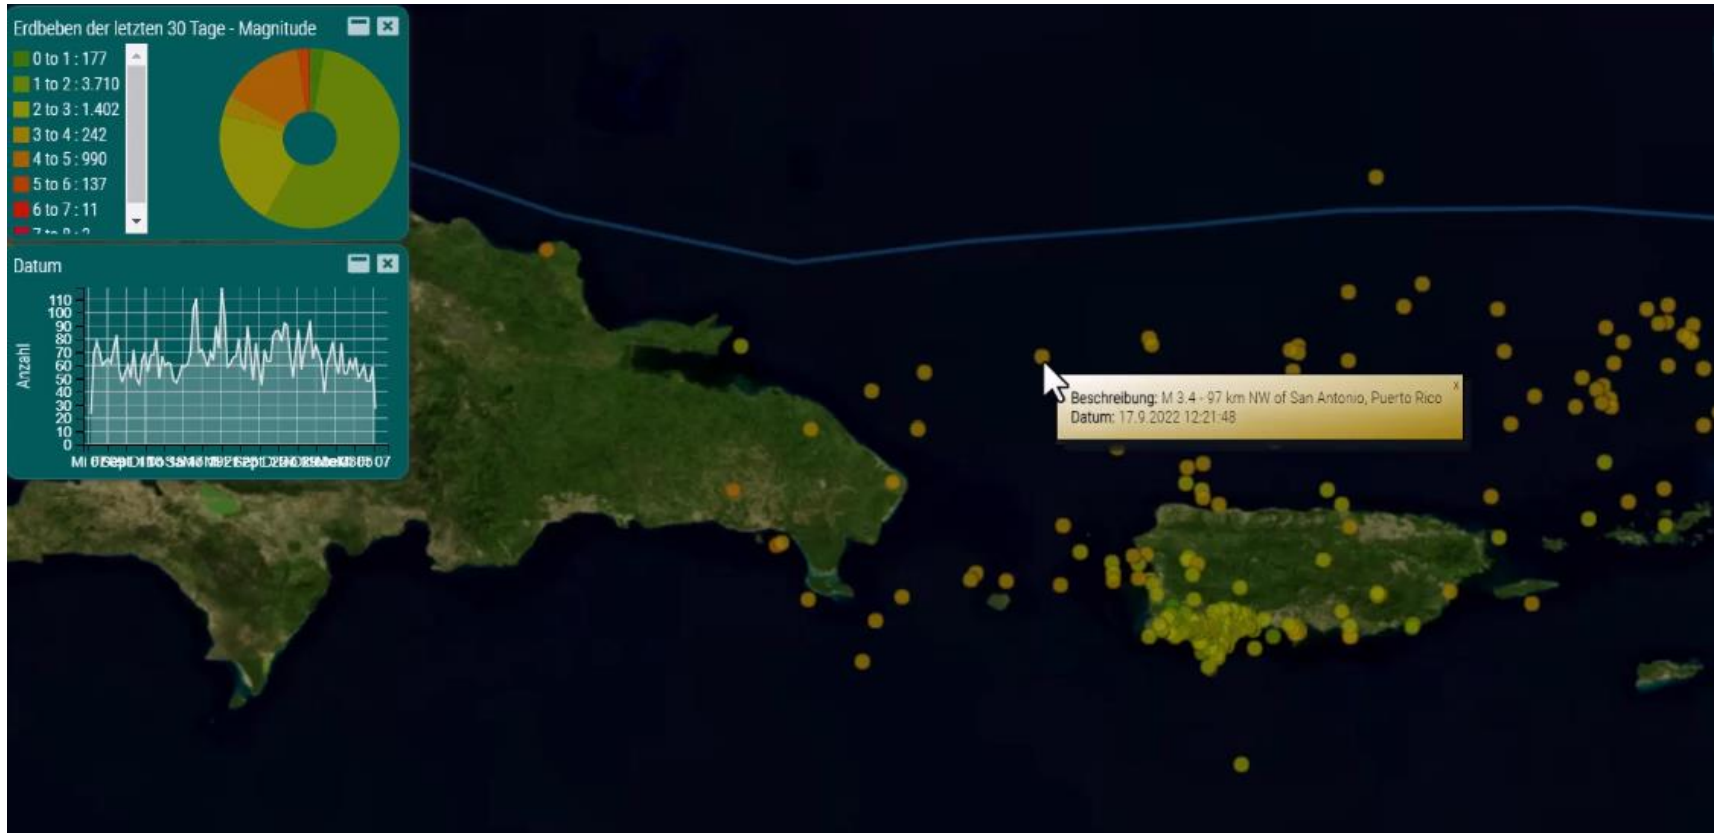

Bare soil

Indicator		Unit	Method to acquire data according to HEART specifications
Imperviousness cover	Imperviousness cover	%	Remote Sensing (satellite image classification) Random Forest surface classification
River and/or sea flooding risk	Urban/residential areas exposed to risks	ha, %	Remote Sensing for surface classification and GIS analysis with precise DEM to calculate Flow accumulation areas
Blue Space availability	% of the area covered by blue spaces	%	Remote Sensing, maybe field survey or existing data are needed for mapping small blue elements
Tree characteristics on site	Tree cover	%	Remote Sensing (Image classification combined with vegetation height calculation from normalized DSM (absolute object heights [DSM-DEM])
	Tree shade for local heat reduction	°C, m2	Remote Sensing / GIS analysis / Maybe Field survey to detect shaded areas below trees and is accessibility
	Leaf Area Index (LAI)	Dimensionless	Remote Sensing (LAI is calculated with ATCOR during the atmospheric correction of the VHR satellite images)
General vegetation status	Vegetation health	NDVI values	Remote Sensing (calculation of vegetation index/indices)
Urban greenness	Neighbourhood greenness	UNGI values	Remote Sensing - UNGI index
	Share of green urban areas	%	Remote Sensing - % of vegetation areas

HEART - HEAlthier Cities through Blue-Green Regenerative Technologies: the HEART Approach

WebGIS toolkit for environmental monitoring and environmental health monitoring

The HARMONIA Project

The HARMONIA project has received funding from the EU Horizon 2020 research and innovation programme under agreement No.101003517.

Development of a Support System for Improved Resilience and Sustainable Urban areas to cope with Climate Change and Extreme Events

HARMONIA will focus on two types of Climate Change (CC) effects:

Natural and man-made hazards intensified by CC, including urban flooding, soil degradation and geohazards (landslides, earthquake, ground deformation)

Man-made hazards, such as heat islands, urban heat fluxes, air quality, gas emissions

HARMONIA will systematically study to integrate knowledge from **EO, IoT, engineering, health, physical social and biological sciences** with **urban planning** and **ICT**.

Project funded in the Horizon 2020 Programme under Grant Agreement 101003517

Pilot Cities

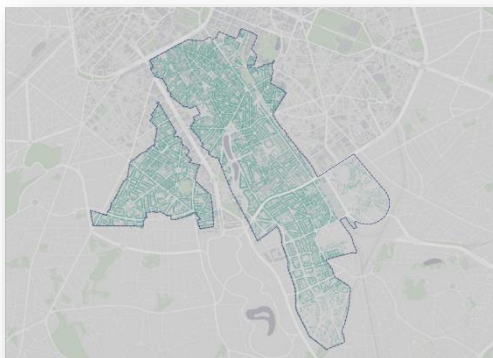

Piraeus

Sofi

Ixelles

Milano

Project funded in the Horizon 2020 Programme under Grant Agreement 101003517

HARMONIA Resilience Decision Support System (DSS)

Project funded in the Horizon 2020 Programme under Grant Agreement 101003517

Conclusion
? Future

Thank You
