

# A Marketplace bridging the gap between AI stakeholders and innovative solutions

Achilleas Marinakis, IT Innovation Center OTE Group

Deploy AI

# Marketplace Objectives & Features

DeployAI

# DeployAI Marketplace - Objectives

- Provide a one-stop-shop for AI-based responsible services and products, including models, datasets, algorithms, and tools
- Democratize access, development and deployment of AI resources made in Europe
- Empower European industries in addressing emerging challenges with cutting-edge AI solutions
- Become the European reference point for Trustworthy AI

# DeployAI Marketplace - Goals

- Advertise the offering of trusted AI resources and their benefits
  - Boost European industry competitiveness and increasing AI maturity and adoption
- Cater the needs of both AI providers and consumers
- Address multiple stakeholders and potential customer groups in the European ecosystem
  - SMEs, large industries, public administrations, DIHs, researchers, etc.

# DeployAI Marketplace - Functionalities

- Offer a visible and secure catalogue of trustworthy AI products made in Europe
- Effectively characterize, categorize and filter these products based on well-defined templates and taxonomies
  - Type of service, business function, business sector
- Fully support purchase path and customer journey
  - IAM, searching & matchmaking, charging & billing mechanisms

# Matchmaking Tool

DeployAI

# DeployAI Marketplace – Matchmaking Tool (1/2)

- A tool for facilitating seamless connections between AI stakeholders and innovative solutions
- Marketplace visitors have access to a list of AI vendors and their expertise
- AI consumers can search for AI vendors, send contact requests to a specific vendor, and send a matchmaking request generally describing their need

# DeployAI Marketplace – Matchmaking Tool (2/2)

- AI vendors can register to the Marketplace and be verified as trustworthy (part of the onboarding process)
- Trustworthy AI vendors can
  - Describe their products and promote them via the Marketplace
  - Retrieve consumers queries and respond to matchmaking requests
- Marketplace administrators overview the matchmaking process
  - Direct the requests to corresponding vendors, view the number of requests that have been completed, address delayed requests, etc.

# Marketplace Content Services

Deploy AI

# DeployAI Marketplace – Commercial Content Services

Innovative AI solutions...

The image displays six product cards from the DeployAI Marketplace, arranged in a row. Each card has a dark blue header with the Deploy AI logo and a yellow title. Below the title is a brief description. Further down, there is a table of metadata including 'About', 'Servicetype', and 'Targetuser'. At the bottom of each card is a quantity selector (set to '1') and an 'ADD TO CART' button. A 'Digital product' label is located at the very bottom of each card.

Product Name	Description	Licensing	Serviceowner	Servicetype
DeepTSF	Codeless forecasting	MIT	ICCS	Software & Consultancy
AI4EF	Adopting energy efficiency	GPL-3.0	ICCS	Software, Consultancy
Logistic DSL	Domain Specific Language (DSL)	MIT	ORU	Easy access to a...
Earth Observation	AI for environmental scientists	Apache 2.0	NCSR - ECMWF	Software service
Bidding Platform	multi-carrier energy management	GPL-3.0	DTU	Software service
MIM's plus	Conformity testing	DTU	DTU	Software service

...spanning across diverse domains

# Open-Source Community Building Strategy

- Building an open-source community around an AI services and products Marketplace can **drive innovation, expand the user base, and build trust**
- Open-source projects thrive on **collaboration, transparency, and shared knowledge**, which can be harnessed to **create a dynamic ecosystem** around the Marketplace

# Open-Source Marketplace – Core Components

- Open API and SDKs
  - Provide open-source Software Development Kits (SDKs) and APIs to enable developers to integrate their AI models and services into the Marketplace
- AI Models Repository
  - Allow contributors to share and improve AI models through a common repository. Each model can be distributed under open-source licenses (e.g., MIT, Apache 2.0)
- Extensions and Plugins
  - Create a framework for developers to build plugins or extensions for the Marketplace

# Open-Source Community – Key Focus Areas

- Collaboration on AI Models
  - Enable a community where developers and AI researchers can contribute and enhance AI models
- Marketplace Contributions
  - Allow the community to contribute to Marketplace's core features (e.g., UX improvements, new tools)
- Open Governance
  - Establish a transparent governance model where decisions about the direction of the Marketplace are made collaboratively by the community
