General Information

Proposal Title: A Dynamic Training programme based on Cyber-Ranges Leveraging IT Security, Privacy and Data Protection Culture and Awareness of Critical Information Infrastructure

Type of Action: DIGITAL-JU-SME (Topic: DIGITAL-ECCC-2022-CYBER-03-CYBER-RESILIENCE)

Project Number: 101128049
Budget: € 3,496,096.60
Duration: 36 months Start Date: 1st January 2024

This project has received funding from the European Union's Horizon Europe research and innovation programme under Grant Agreement No 101128049.

Consortium

SecAwarenessTruss is a collaboration of 9 organizations from Greece and Cyprus, including:

- 3 industrial partners
- 4 critical infrastructure organizations from telecom, energy, health, and maritime sectors
- 2 SMEs

This project has received funding from the European Union's Horizon Europe research and innovation programme under Grant Agreement No 101128049.

SecAwarenessTruss will deliver a **customized federated cyber range platform** with **systematic** and **innovative** training programs for IT & non-IT Experts.

The platform targets **Critical Infrastructure organizations** to develop a skilled workforce for cyber defense and collaborative response.

The project will include:

- Cross-sector complex scenarios
- Gamification-based exercises
- Knowledge-sharing capabilities
- Hands-on and interactive learning facilities

Objectives

Deliver a state-of- the-art platform	Extend capabilities of existing cyber ranges
	Structure training frameworks for effective cyber defense
Develop and deliver training curricula	Innovative and hands-on approach
	Sustainable programs for critical infrastructure
Develop realistic scenario	Large-scale, cross-sector
	Incorporate gaming exercises
Share threat intelligence	Knowledge sharing among cyber ranges
	Enhance coordinated cyber-incident response
	Create common data repository
Evaluate and strengthen ranges	Develop best practices
	Guidelines for wider adoption across Europe

Pilots

The four critical infrastructure sectors and featuring different characteristics, services, infrastructures and training needs.

Energy - PPC

HealthCare - PAGNI

Maritime - DSA

This project has received funding from the European Union's Horizon Europe research and innovation programme under Grant Agreement No 101128049.

DOTE – Telecom industry

- The Hellenic Telecommunications Organisation S.A. (OTE) manages a large digital infrastructure for ICT services.
- OTE will provide based on our IT Security unit expertise necessary information and requirements for the creation of training programmes for both IT and non IT experts.
- 2 groups of trainees will be trained.

OTE Contribution:

- Cybersecurity coordinating and policy making activities
- Enhance situational awareness
- Train response teams
- Simulate attack and response scenarios
- Security awareness

D Pilots

ENERGY: Public Power Corporation (PPC) operates a significant energy infrastructure. The pilot infrastructure exchanges data for diagnostics and maintenance, focusing on network traffic, electrical measurements, and incident reports.

HEALTHCARE: PAGNI, the largest hospital in Crete, operates an integrated information system connecting medical care, pharmacy, and patient records.

MARITIME: The Digital Security Authority (DSA) is a new independent governmental agency under the supervision of the Commissioner of Communications. It is responsible for the implementation of the European NIS (Network and Information Security) Directive, with a strong focus on upgrading and maintaining high levels of cybersecurity for all the operators of essential services and critical information infrastructures in Cyprus.

This project has received funding from the European Union's Horizon Europe research and innovation programme under Grant Agreement No 101128049.
